1

## Overview of LUPA Analytics

### Data Assumptions Made

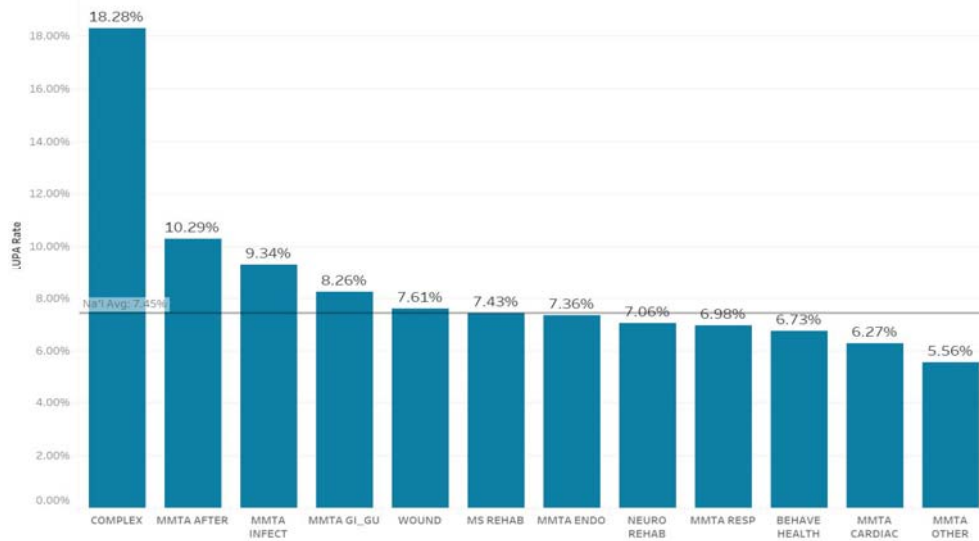

- 2018 CMS claims data re-casted under PDGM methodology
- Converted 60-day episodes into periods without exclusions
- If primary diagnosis did not match to clinical grouping, the secondary diagnosis was used
  - Resulting in between 10% – 20% more claims recalculated
- Calculated actual LUPA rate, based on PDGM rules and visit stratification as contained in the claims data
